

SQL Assignment – 2(Intermediate) – Company, Department and Employee table

```
3      #1. Query all rows from Department table?
4
5 •    select * from department_tb1;
6
```

Result Grid | Filter Rows: | Export:

	id	name
▶	1	IT - 1
	2	Management
	3	IT - 2
	4	Support

```
7      #2. Change the name of department with id = 1 to 'Management'?
8
9 •    SET Sql_safe_updates=0;
10 •   UPDATE department_tb1
11     SET name = 'Management'
12     WHERE id = 1;
13 •   select * from department_tb1;
```

Result Grid | Filter Rows: | Export: | Wrap Cell Content:

	id	name
▶	1	Management
	2	Management
	3	IT - 2
	4	Support

```
15     #3. Delete employees with salary greater than 100000?
16
17 •    DELETE FROM Employee_tb
18     WHERE salary > 100000;
19 •    select * from Employee_tb;
```

Result Grid | Filter Rows: | Export: | Wrap Cell Content:

	id	name	city	department_id	salary
▶	1	David	London	3	80000
	2	Emily	London	3	70000
	3	Peter	Paris	3	60000
	4	Ava	Paris	3	50000
	6	Jim	London	2	90000
	7	Amy	Rome	4	30000

```
21      #4. Query the names of companies?
22
23 •    SELECT name FROM Company_tb;
```

<

Result Grid |  Filter Rows: | Export: 

	name
▶	IBM
	GOOGLE
	Apple

```
25      #5. Query the name and city of every employee?
26
27 •    SELECT name,city FROM employee_tb order by city;
28
```

<

Result Grid |  Filter Rows: | Export:  | Wrap Cell

	name	city
▶	David	London
	Emily	London
	Jim	London
	Peter	Paris
	Ava	Paris
	Amy	Rome

```
29      #6. Query all companies with revenue greater than 5000000?
30
31 •    SELECT name,revenue FROM Company_tb
32      where revenue>5000000;
```

<

Result Grid |  Filter Rows: | Export:  | Wrap Cell Content: 

	name	revenue
▶	GOOGLE	9000000
	Apple	10000000

```
34      #7. Query all companies with revenue smaller than 5000000?
35
36 •    SELECT name,revenue FROM Company_tb
37      where revenue < 5000000;
38
```

<

Result Grid |  Filter Rows: | Export:  | Wrap Cell Content: 

	name	revenue
▶	IBM	2000000

```

39 #8. Query all companies with revenue smaller than 5000000, but you cannot use the '<' operator?
40
41 • SELECT name, revenue FROM Company_tb
42 where revenue between 0 and 5000000;
43

```

Result Grid | Filter Rows: | Export: | Wrap Cell Content:

	name	revenue
▶	IBM	2000000

```

44 #9. Query all employees with salary greater than 50000 and smaller than 70000?
45
46 • SELECT * FROM Employee_tb
47 WHERE salary > 50000 AND salary < 70000;
48

```

Result Grid | Filter Rows: | Export: | Wrap Cell Content:

	id	name	city	department_id	salary
▶	3	Peter	Paris	3	60000

```

49 #10. Query all employees with salary greater than 50000 and smaller than 70000, but you cannot use BETWEEN?
50
51 • SELECT * FROM Employee_tb
52 WHERE salary > 50000 AND salary < 70000;
53

```

Result Grid | Filter Rows: | Export: | Wrap Cell Content:

	id	name	city	department_id	salary
▶	3	Peter	Paris	3	60000

```

54 #11. Query all employees with salary equal to 80000?
55
56 • SELECT * FROM Employee_tb
57 WHERE salary = 80000;
58

```

Result Grid | Filter Rows: | Export: | Wrap Cell Content:

	id	name	city	department_id	salary
▶	1	David	London	3	80000

```

59 #12. Query all employees with salary not equal to 80000?
60
61 • SELECT * FROM Employee_tb
62 WHERE salary <> 80000;
63

```

Result Grid					
Filter Rows:					
Export: Wrap Cell Content:					
	id	name	city	department_id	salary
▶	2	Emily	London	3	70000
	3	Peter	Paris	3	60000
	4	Ava	Paris	3	50000
	6	Jim	London	2	90000
	7	Amy	Rome	4	30000

```

64 #13. Query all departments (each name only once)?
65
66 • SELECT DISTINCT name FROM department_tb1;

```

Result Grid	
Filter Rows:	
Export: Wrap Cell Co	
	name
▶	Management
	IT - 2
	Support

```

68 #14. Query names of all employees together with id of department they work in, but you cannot use JOIN?
69
70 • SELECT distinct name, department_id
71 FROM Employee_tb order by department_id;
72

```

Result Grid		
Filter Rows:		
Export: Wrap Cell Content:		
	name	department_id
▶	Jim	2
	Ava	3
	David	3
	Emily	3
	Peter	3
	Amy	4

73 #15. Query names of all employees together with id of department they work in, using JOIN?

74 • `SELECT e.name,e.department_id,d.id`

75 `FROM Employee_tb e`

76 `JOIN Department_tb1 d`

77 `ON e.department_id = d.id`

78 `order by e.department_id;`

79

Result Grid | | Filter Rows: | Export: | Wrap Cell Content:

	name	department_id	id
▶	Jim	2	2
	David	3	3
	Emily	3	3
	Peter	3	3
	Ava	3	3
	Amy	4	4

80 #16. Query name of every company together with every department?

81

82 • `SELECT distinct c.name, d.name`

83 `FROM Company_tb c`

84 `CROSS JOIN Department_tb1 d;`

85

Result Grid | | Filter Rows: | Export: | Wrap Cell Content:

	name	name
▶	Apple	Management
	GOOGLE	Management
	IBM	Management
	Apple	IT - 2
	GOOGLE	IT - 2
	IBM	IT - 2
	Apple	Support
	GOOGLE	Support
	IBM	Support

86 #17. Query employee name together with the department name that they are not working?

87

88 • `SELECT distinct e.name, d.name`

89 `FROM Employee_tb e`

90 `CROSS JOIN Department_tb1 d`

91 `WHERE e.department_id <> d.id;`

Result Grid | | Filter Rows: | Export: | Wrap Cell Content:

	name	name
▶	David	Support
	David	Management
	Emily	Support
	Emily	Management
	Peter	Support
	Peter	Management
	Ava	Support
	Ava	Management
	Jim	Support
	Jim	IT - 2
	Jim	Management
	Amy	IT - 2
	Amy	Management

```

93      #18. Query names of every company and change the name of column to 'Company'?
94
95 •    SELECT name AS Company
96      FROM Company_tb;

```

< 

Result Grid   Filter Rows: | Export:  | Wrap Cell Content: 

	Company
▶	IBM
	GOOGLE
	Apple

```

98      #19. Query the city wise salary?
99
100 •   SELECT distinct city, sum(salary)
101      FROM Employee_tb
102      GROUP BY city;
103

```

< 

Result Grid   Filter Rows: | Export: 

	city	sum(salary)
▶	London	240000
	Paris	110000
	Rome	30000

```

104     #20. Query the highest revenue company name?
105
106 •   SELECT name,revenue
107      FROM Company_tb
108      ORDER BY revenue DESC
109

```

< 

Result Grid   Filter Rows: | Export:  | Wrap Cell

	name	revenue
▶	Apple	10000000
	GOOGLE	9000000
	IBM	2000000
